ACHIEVEMENTS

VDB GitHub Contribution	Maintained and scaled 4 repositories at VDB GitHub (Link) contributing over 2500+ commits across 2.5 years at Virtual Diamond Boutique (VDB).
Jira Ticket Resolution	Resolved over 250+ Jira tickets , ensuring timely delivery of features and bug fixes for Angular and React-based projects.
Critical SEV1 Resolution	Addressed over 20+ critical SEV1 incidents , mitigating high-priority issues to maintain application stability and uptime.

EXPERIENCE

Virtual Diamond Boutique | Front-End Developer Gurgaon, Delhi | September 2022 - Feb 2025

Key Technologies: Angular, TypeScript, JavaScript, RxJS, NgRx (State Management), CSS (Bootstrap, Tailwind), React.js (exploring), Next.js (exploring), Figma, AWS (S3, CloudFront), npm, nvm, Sentry, GitHub, HTML, MongoDB

GitHub Contributed: <https://github.com/GYogesh1234>

- Led a team of **3 Angular developers** to enhance a **3D jewelry configurator**, integrating **interactive buttons, tooltips**, and customization options with **lazy-loaded modules** and optimized Change Detection strategies, ensuring seamless performance across desktop and mobile devices.
- Designed and implemented a reusable **Angular sign-up form** using **TypeScript, RxJS**, and **Angular Component Lifecycle Hooks**, replacing a static form with dynamic, reactive components; adopted by **30+ organizations**, boosting user onboarding speed by **25%** and enhancing cross-platform compatibility.
- Developed responsive **UI components** in a team of 8 React developers using **React.js, Bootstrap**, and **Tailwind CSS**, reducing page load times by **30%** across **50+ pages** through efficient **API consumption** and **Agile-driven workflows**.
- Revamped the **Product Detail Page layout** in collaboration with designers via **Figma**, leveraging **Angulars Lazy Loading** and **module splitting** to deliver a clean, user-friendly interface with a **15% increase in user engagement**.
- Optimized navigation and data filtering by managing **query parameters** and integrating **RESTful APIs**, improving **front-end to back-end connectivity** and **reducing data retrieval latency** by **20%**.
- Utilized **Sentry** for real-time error tracking and resolution, achieving a **90% reduction in critical bugs** and **maintaining application stability** under high traffic.
- Maintained **high code quality** using **GitHub** for version control, ensuring cross-browser compatibility with **Bootstrap**, and debugging with **DevTools**; implemented **NgRx** for global state management to streamline data flow in Angular applications.
- Explored **AWS services (S3, CloudFront)** for asset storage and delivery, integrating **3D model rendering** with MongoDB-backed data, supporting scalable front-end solutions for e-commerce platforms like Shopify.

National Informatic Center | Intern Full Stack Developer Jaipur, Rajasthan | June 2021 - July 2022

Foodie Local Restaurant Platform

Key Technologies: HTML, CSS, JavaScript, PHP, MySQL, XAMPP

- Developed a restaurant discovery and ordering platform using **HTML, CSS, JavaScript**, and **PHP**, featuring a responsive, user-friendly interface that supported browsing and ordering from local restaurants for **1000+ records**.
- Integrated social media authentication and secure payment gateways, leveraging **logic-building skills** to streamline user flows, enhance security, and improve login reliability by **15%** through optimized session handling.
- Designed and optimized a scalable **MySQL** database with **XAMPP**, writing efficient queries to manage restaurant listings, user orders, and transaction data, reducing retrieval times by **20%**.
- Documented a modular codebase with clear comments and structure, enabling future scalability and facilitating potential full-stack enhancements like **API integrations**.

SKILLS

Programming Languages: C++, JavaScript, CSS, HTML, TypeScript, PHP
Libraries/Frameworks: React, Next.js, Angular, Bootstrap, Tailwind CSS, JQuery
Tools / Platforms: Git, VSCode, GitHub, JIRA, Vercel, AWS(S3), AWS(cloudfront), Sentry, XAMPP, Linux, Slack
Databases: MySQL, SQL, MongoDB(exploring)

EDUCATION

Jaypee Institute of Information Technology CSE B.Tech. CGPA: 6.8	Noida, UP 2017 - 2022
St. Anselm Sr. Sec. School PCM 12th Class Percentage: 82%	Jaipur, Rajasthan 2017

LIVE PROJECTS

VDB MarketPlace 2.0 Sign Up Page <i>Key Technologies: Angular, TypeScript, JavaScript, RxJS, NgRx, CSS (Bootstrap, Tailwind), React.js, Figma, AWS (S3, CloudFront), GitHub, HTML, MongoDB.</i> <i>Features: .</i> <ul style="list-style-type: none">Designed implemented a multi-step sign-up system using Material Stepper, improving user experience reducing drop-off rates..Includes field validation real-time username verification against the database.Developed modular, reusable form components, supporting whitelabeling custom theming for multiple client use cases.Added secure file upload support for multiple formats, ensuring compliance with business security requirements.Enabled whitelabeling for multiple clients, allowing custom branding themes, increasing partner adoption by over 30 Clients.
