LinkedIn — GitHub — LeetCode

PROFESSIONAL SUMMARY

Web Developer with 2.5 years of experience in building and optimizing dynamic web applications. Proficient in Angular, TypeScript, and AWS, with experience in responsive design, API integration, and debugging. Recently started exploring React to broaden frontend skills. Eager to apply problem-solving abilities in development and contribute to team projects.

Worked on over **250+ Jira tickets**, focusing on issue resolution and feature requests. Solved more than 250 problems on LeetCode, strengthening my understanding of algorithms and problem-solving approaches, which I apply in both development and troubleshooting.

TECHNICAL SKILLS

Programming Languages:
- C, C++, Java, Python, HTML5, CSS3, JavaScript, TypeScript, PHP

Libraries/Frameworks:
- Angular, React.js (started), jQuery, Bootstrap, Node.js, Express.js

Tools/Platforms:
- Git, GitHub, AWS (CloudFront, S3), VS Code, Visual Studio, Linux, Jira, Slack

Databases:
- MySQL, SQL

Other Skills:
- Responsive Design, Cross-browser Compatibility, Lazy Loading, Code Splitting
- Problem Solving, Analytical Thinking, Scrum

Conceptual Skills:
- Object-Oriented Programming (OOP), Data Structures, Algorithms, Computer Networks
- Subjects: Data Structures and Algorithms, Object-Oriented Paradigms, Operating Systems, Database Management Systems (DBMS)

EDUCATION

Jaypee Institute of Information Technology, Noida
Bachelor of Technology in Computer Science & Engineering (B. Tech)
Graduation Date: May 2022   CGPA: 6.7

St. Anselm Senior Secondary School, Jaipur
XII Standard (PCM)
Graduation Date: Mar 2017   Score: 82%

EXPERIENCE

Virtual Diamond Boutique —— Frontend Web Developer   Gurgaon, India
Sep 2022 – Present
- Developed and deployed a Dynamic Sign-Up Form to improve user experience and performance.
- Optimized application code and integrated new features, enhancing the VDB app's efficiency.
- Managed build and deployment pipelines, ensuring smooth transitions between development, testing, and live environments.
- Conducted performance testing with JMeter, identifying bottlenecks and optimizing system availability.
- Deployed and maintained applications on Microsoft Azure, ensuring secure infrastructure and seamless delivery.
- Implemented error tracking and management using Sentry for real-time issue resolution.
- Designed and developed responsive web pages, ensuring scalability and cross-browser compatibility.

- Troubleshot and resolved website issues, including HTTP/HTTPS conflicts, sitemap errors, and overlay issues.
- Performed regular maintenance, including plugin updates, SSL updates, and vulnerability monitoring.
- Optimized performance with cache purging, script exclusions, and post-optimization troubleshooting.
- Handled and resolved over **250+ Jira tickets** related to various tasks and issues.

National Informatics Center —— Intern Jaipur, India
Jun 2021 – Jul 2021
- Built responsive web interfaces with HTML, CSS, and JavaScript.
- Enhanced functionality with social media authentication and secure payment options.
- Documented codebases for future scalability.

PROJECTS

Foodie – Local Restaurant Platform
- Developed a Zomato-inspired platform using HTML, CSS, PHP, and JavaScript.
- Enhanced dining experiences by creating a centralized hub for users to browse and order from local restaurants.

Safety Checker for Android Apps
- Developed a malware detection system using Python and Machine Learning.
- Used static and dynamic analysis models to classify apps and identify potential threats.
